

## STAREAST 2003 – Track Presentations – W4

**Name:** Greg Paskal  
**Company:** Kinko's  
**Title:** Rapid Web Testing in a High-Velocity Environment  
**Course Type:**  
**Time:** Wednesday, May 14, 1:00 p.m.  
**Track:** **Web/eBusiness Testing**

### **Presentation Description:**

It's going live tonight?! How can I test Web changes when I'm given only a few hours for testing? In this session, Greg Paskal presents the Minimum Essential Testing Strategy (METS). Designed to aid in your rapidly changing Web environment, this creative technique enhances all your Web testing efforts, regardless of time constraints or type of application. You'll walk away with a starter strategy and the necessary skills to adapt the new strategy to your organization's needs. Plus, you'll discover ways to provide additional, valuable feedback to developers in a shorter timeframe.

- Obtain new-fangled rapid Web testing techniques
- Modify METS to meet your specific needs
- Avoid common Web testing "gotchas" early in the testing process
